STUDY IN THE CZECH REPUBLIC

The Czech Republic is a diverse and dynamic country with just over 10 million inhabitants, located in the heart of Europe. It is a **safe and developed country** with a high standard of living, many historic and cultural sites and beautiful nature. The Czech Republic is a member of the European Union as well as European border-free Schengen Area.

Prague is the capital city of the Czech Republic as well as a **cultural and economic centre of Central Europe**. The city is among the ten richest regions in the European Union and one of the most beautiful cities in the world, with many architectural gems and number of well-known cultural sites.

Czech Republic has a **century-long engineering tradition**. Czech industry is famous for high quality products and Czech companies have a reputation of reliable partners. Among the main industries are automotive, machine building, environmental technologies, aviation, chemical industry or medical equipment.

Thanks to the developed Czech industry, advanced economy and location in the centre of Europe, Prague is a perfect place to combine the **study of business and technology**. For this purpose, MIAS CTU in Prague is the best choice!

STUDY AT MIAS CTU

The **Czech Technical University in Prague** (CTU) is an internationally recognised university with more than 310 years of tradition and an excellent reputation. It is the best technical university in the country and one of the best universities in Central and Eastern Europe. CTU partners with over 500 foreign universities, and there are currently about 18.000 students studying at CTU, with every fifth student coming from abroad.

MIAS CTU offers an excellent opportunity to combine business and technology. It is located within Dejvická campus in one of the most desirable districts of Prague, with an **excellent access to all campus facilities** including dormitories, library, sports facilities, numerous restaurants, as well as to the historical centre or to the airport.

MIAS CTU degree programmes offer a unique combination of business and management education with technical insights, assuring a **high demand by prospective employers** and broad career perspectives for graduates. All degree programmes are accredited by the National Accreditation Bureau for Higher Education.

MIAS CTU uses the internationally recognized European Credit Transfer and Accumulation System (ECTS). Each academic year is organized in two semesters with an extended summer break. Classes are usually concentrated in three days a week, enabling students to efficiently manage their time. Seminars are taught in **small groups**, which enhances cooperation and communication.

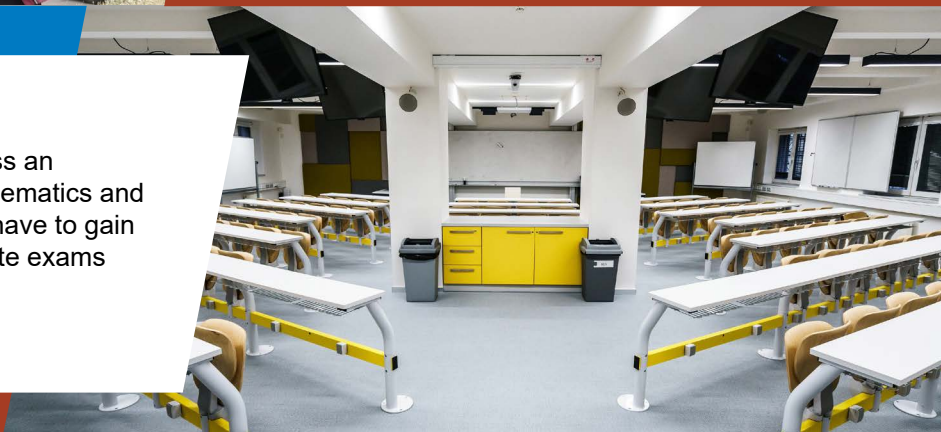

BACHELOR OF SCIENCE

The **undergraduate three-year Economics and Management programme** prepares students for professional work in international teams and entry-level managerial positions in industry, commerce, consulting and public administration. Graduates may continue in their studies in Master degree programme at MIAS CTU or anywhere else in the world.

To be admitted to study, applicants have to pass an entrance exam, which consists of tests in Mathematics and English. To **successfully graduate**, students have to gain 180 ECTS credits in three years, pass final state exams and defend a diploma thesis.

Compulsory subjects include Mathematics, Business Economics, Informatics, Principles of Accounting, Logistics, HR Management, Principles of Corporate Finance and Quality Management. **Selection of technical courses** familiarize students with modern industry and elective courses in social, communication and cultural competences enhance students' soft skills.

Students can choose from the wide range of the facultative courses during their studies and gain in-depth expertise in a field of their choice. Students may enhance their personal experience by choosing from a broad offer of opportunities for **short-term and long-term study mobility** in Europe and overseas.

4

MASTER OF SCIENCE

The **two-year graduate Innovation Project Management** programme provides students with a knowledge of economics, management and innovation. It prepares highly skilled professionals for mid-level and top-level management positions in industry and commerce.

To be successfully admitted to study, applicants have to pass an entrance exam, which consists of a test in English and fundamentals of Mathematics, Economics and Statistics. To **successfully graduate**, students have to gain 120 ECTS credits, pass final state exams and defend a diploma thesis.

Study plan includes compulsory subjects such as Corporate Financial Management, Marketing Innovations, Controlling, or Strategic Management. Students may select from the **wide spectrum of specialized courses**, e.g. Lean Manufacturing, Smart Cities and Regions, Financial Markets and Risk Management, or Communication Systems and Networks.

Students may pursue their individual goals by **studying abroad in Europe or overseas** up to two semesters, participating in internships, or taking part in research projects and conferences.

PREPARATORY COURSES

Students may enrol in the **Preparatory Course of Czech** and get an opportunity to enter any of the degree programmes offered not only by MIAS CTU but also by other Czech universities. Take a chance to get a degree from a university for free.

Besides the classes of Czech, Czech History and Culture, our programme includes **trips and excursions** to the most interesting places in the Czech Republic. In addition, exams of Czech at B1 and B2 level according to CEFR are included in the programme.

Preparatory English Course is designed for all students who would like to study at any of the degree programmes at MIAS CTU and want to improve their language skills at first. The Course is comprised of intensive English in-class sessions, classes of Business English, Intercultural Correspondence or Everyday Mathematics. The required level of English to be enrolled on the programme is B1 according to CEFR.

Students of the Preparatory Course can choose from a varied list of **optional subjects** such as Cross-Culture Management, Entrepreneurship and Business Plan to deepen their knowledge.
