

INTERNATIONAL PROJECT WORKSHOP – PROJECT ASSIGNMENT		
NAME OF THE COMPANY	Komerční banka	
NAME OF THE PROJECT	Measurement in KB@Agile	
PROJECT DESCRIPTION		
<p><i>KB is using standard OKR (Objectives & Key Results) methodology and Agile@Scale QBR process. OKR described theoretically for example in “Measure what matters” book by John Doerr. Unfortunately, in a complex banking environment, it is hard to strictly follow it and to be able to setup consistent, comparable, well measurable Key Results for most of our Objectives. Reasons are a lot: no AB testing possible, a lot of enabling activities, complex dependencies of business results, etc. We would like to develop adjusted OKR methodology for KB or other complex institution (with significant part of “non-customer” needs – mandatory due to regulation) and update planning and prioritization process in Agile@Scale QBR.</i></p>		
PROJECT SPECIFICATION		
Goal	<i>Create adjusted OKR methodology and update of Agile@Scale QBR process</i>	
Methods	<i>Business analysis of current situation, searching in relevant literature, etc.</i>	
Tools	<i>Jira, Confluence</i>	
Inputs/Sources	<i>Existing KB OKR, Agile@Scale QBR process, methodology, business results analysis</i>	
Expected output	<i>Methodology = 10 pages document</i>	
Acceptance criteria	<i>Feasibility of proposed methodology to be implemented in KB</i>	
Project boundaries	<i>Out of scope is business strategy, we focus on methodology how to measure and set objectives</i>	
Milestones	<i>no</i>	
Other important information	<i>no</i>	
REQUIREMENTS FOR PARTICIPANTS <i>(What are the key abilities students should have in order they can handle with the project)</i>		
Must have	Good to have	Additional advantage
<i>Analytical skills</i>	<i>Overview about banking business</i>	<i>Interest in Agile@scale</i>
